US Oncology

This program is made possible through an
unrestricted educational grant provided by

AMGEN®

ORTHO BIOTECH

Target Audience

This symposium is directed toward oncology nurses in inpatient and outpatient settings who have a desire to be abreast of the latest cancer care issues that can be implemented successfully and practically in their clinical settings.

Presentations

Leading experts in their fields will discuss:

- The Future of Oncology Nursing: Where Are We Going?
- Leadership Trends
- Legislative Issues and the Power of Nursing
- Breast Cancer Treatment Issues
- Reimbursement – Charge Capture: Practical Application In Daily Practice
- Legal and Ethical Issues In Cancer Care in 2002
- Symptoms of Cancer Treatment Modalities
 - Hand/foot syndrome
 - Pain
 - Peripheral Neuropathy
- Genetics and Cancer Care: A Guide for Oncology Nurses
- New Oncology Drugs: Present and Pipeline
